

# Teen Birth Rate in California, Texas, and United States, 1991-2009

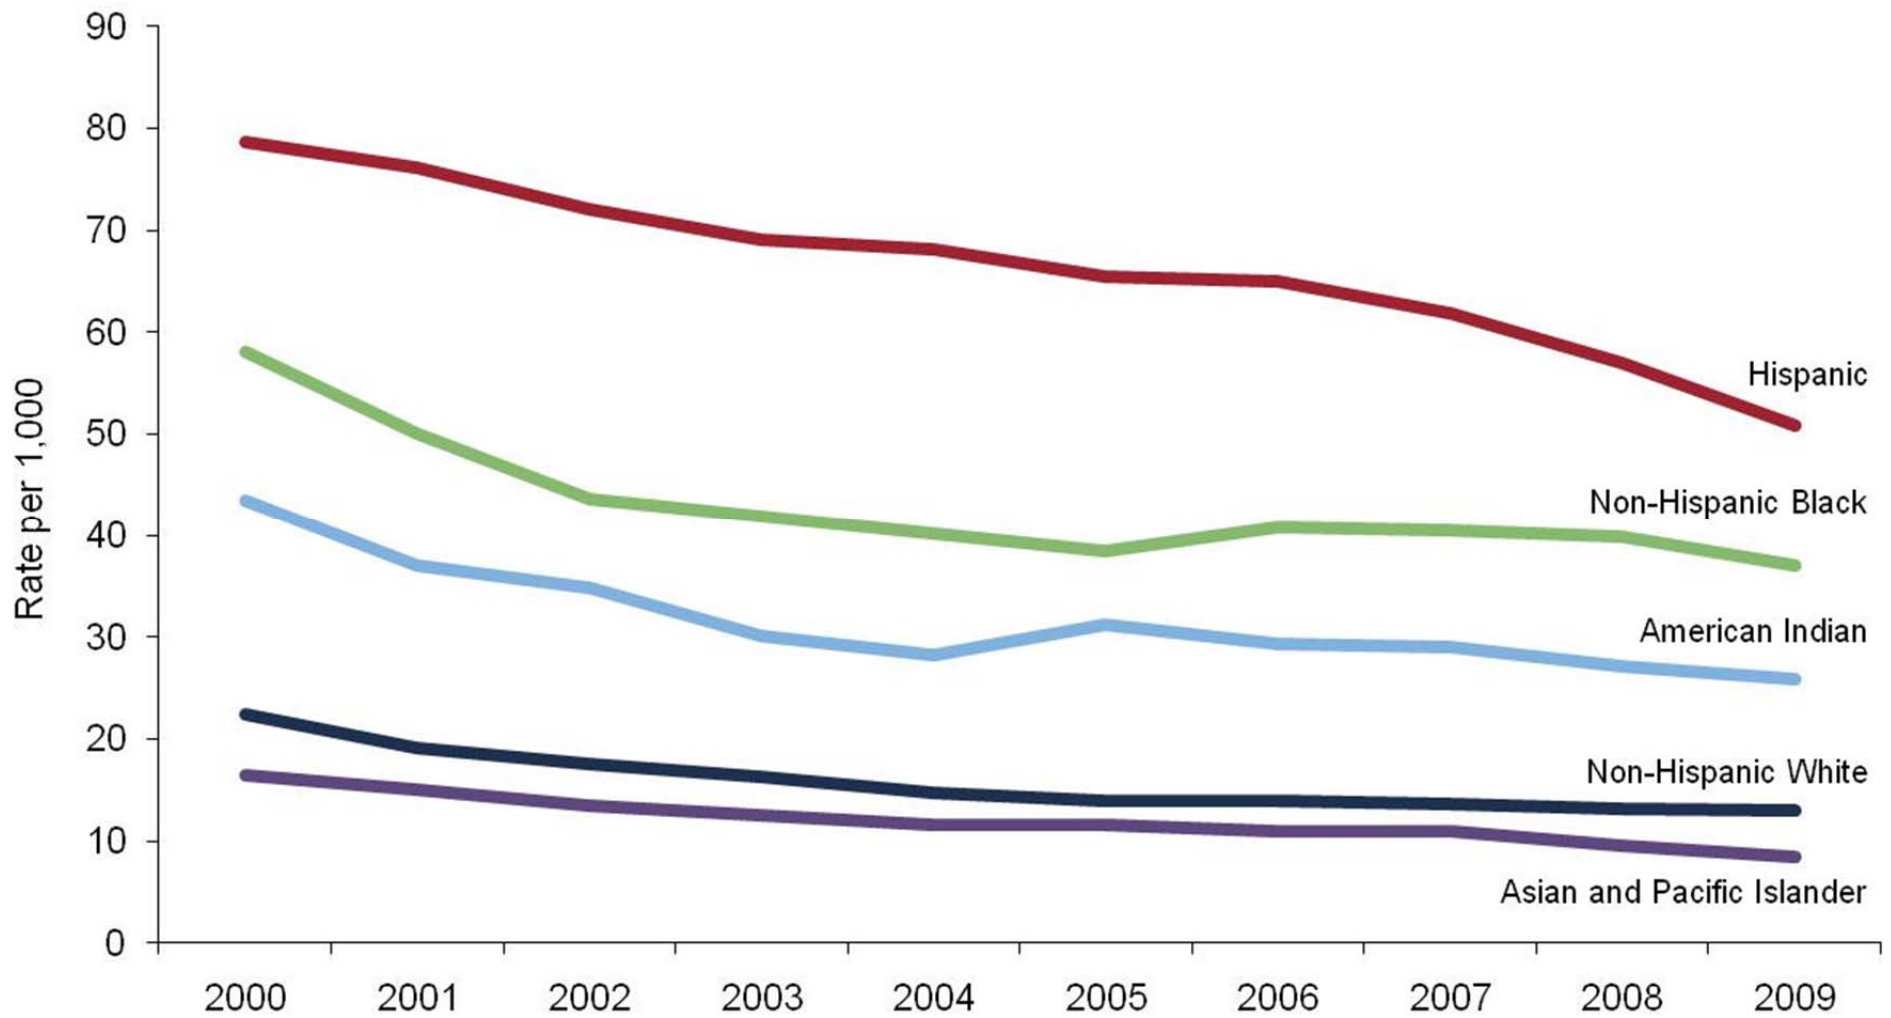

# Teen Birth Rate in California, United States, and Other Western Nations, 2004-2009

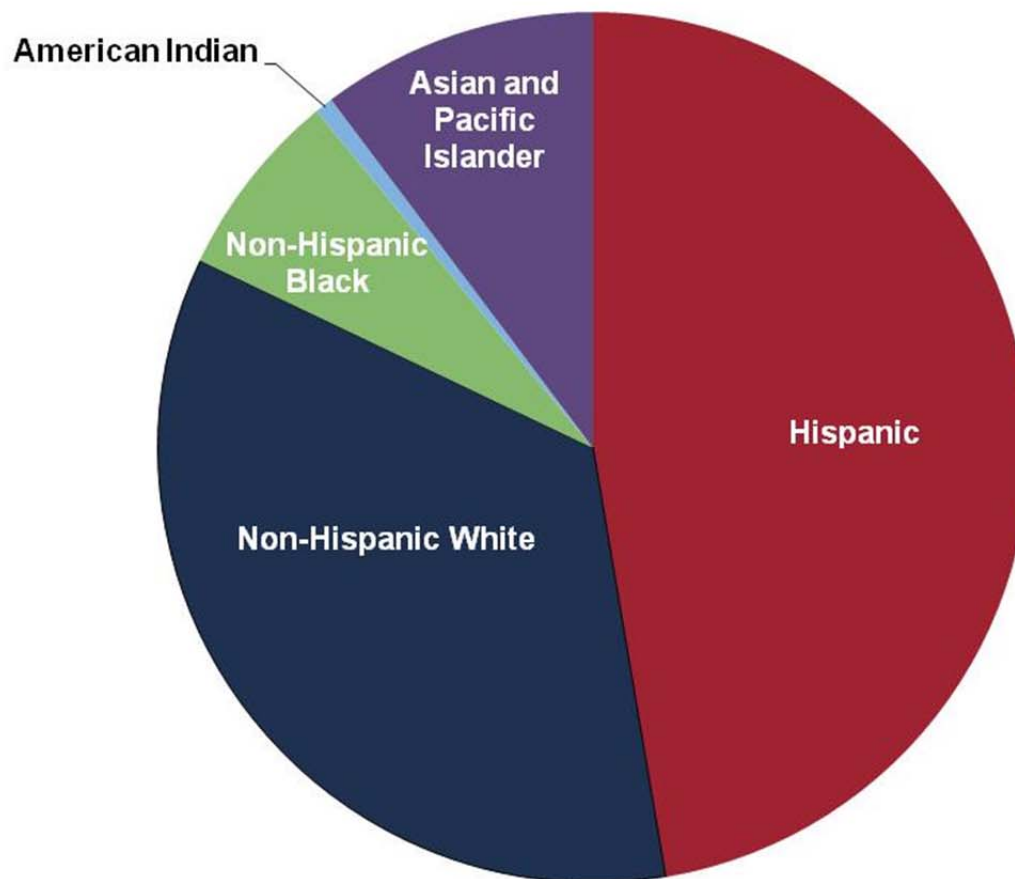

# Teen Pregnancy Prevention Investments vs. Taxpayer and Societal Cost Savings in California

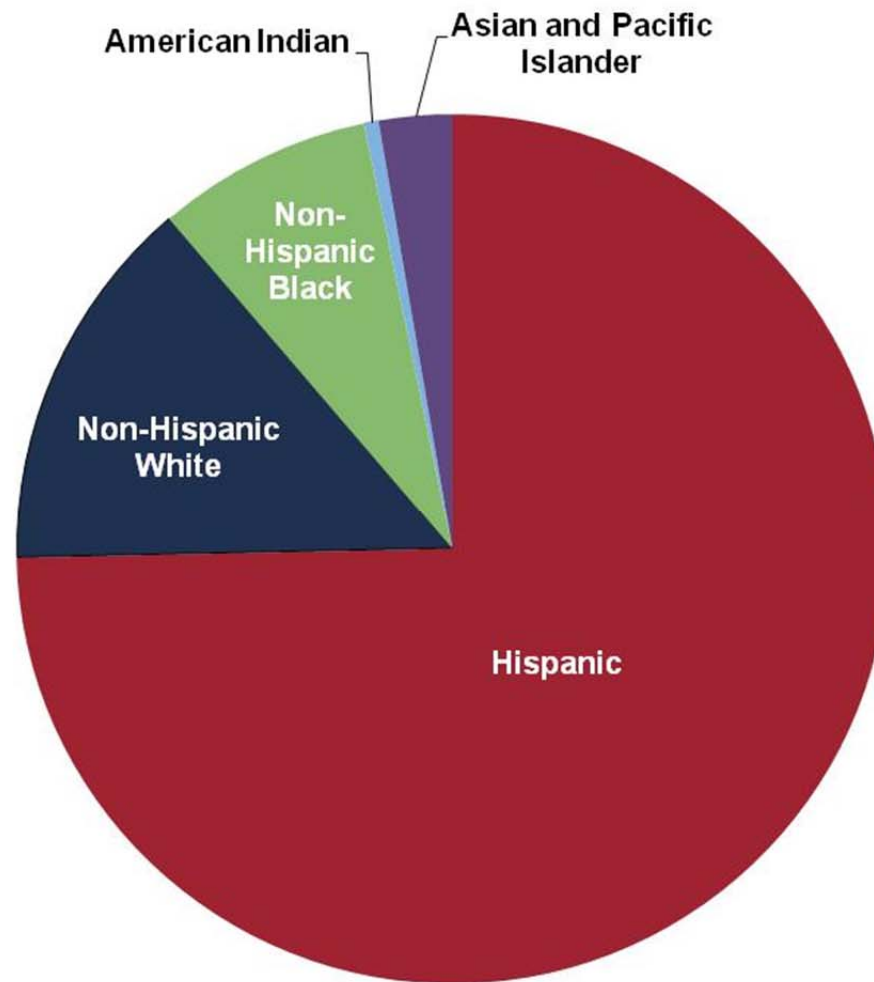

# Teen Birth Rate by Race and Ethnicity in California, 2000-2009

# Female 15-19 Population by Race and Ethnicity in California, 2009

# Teen Births by Race and Ethnicity in California, 2009

# Notes

## Slide 1

California rates are based on birth numbers from the California Department of Public Health (CDPH) and population estimates from the California Department of Finance (CDF). United States and Texas rates are from the Centers for Disease Control and Prevention's National Vital Statistics Reports.

## Slide 2

Teen birth rates for other Western nations are from the United Nation's 2008 Demographic Yearbook.

## Slide 3

The taxpayer and societal cost savings in California were calculated using previously published annual costs per teen birth, adjusted for inflation, and the number of teen births reported for the stated year. The dollar amounts for the teen pregnancy prevention investments were obtained from budget reports and analyses of various California-based organizations.

## Slide 4

California teen birth rates by race and ethnicity are based on birth numbers from CDPH and population estimates from CDF.

## Slide 5

The female 15-19 year-old population by race and ethnicity is from CDF population estimates.

## Slide 6

California teen birth numbers by race and ethnicity are from CDPH.
