April 15, 2014
Teen Birth Rates by Female Teen Chlamydia Rates for California Counties, 2012

County rates: $r \ (\text{TBR} \ & \ \text{chlamydia}) = .33$

April 15, 2014
Teen Birth Rates by Female Teen Gonorrhea Rates for California Counties, 2012

County rates: $r$ (TBR & gonorrhea) = .17

April 15, 2014
California Chlamydia Rates by Selected Characteristics, 2012
California Gonorrhea Rates by Selected Characteristics, 2012
Methods Notes

Birth Rates
California birth numbers are from the California Department of Public Health (CDPH). California birth rates are based on birth numbers from CDPH and updated, Census-2010-based population estimates and projections from the California Department of Finance (DOF).

United States and Texas birth numbers and rates are from the National Center for Health Statistics’ (NCHS) National Vital Statistics Reports. Texas birth rates for some years were calculated using birth numbers and bridged-race population estimates from the NCHS.

Teen birth rates for other Western nations are from the United Nation’s 2012 Demographic Yearbook.

Chlamydia and Gonorrhea Rates
California chlamydia and gonorrhea rates were calculated using case numbers from the CDPH Sexually Transmitted Diseases Control Branch’s Sexually Transmitted Diseases Local Health Jurisdiction Data Summaries, 2012, and updated, Census-2010-based population estimates and projections from DOF.

United States and Texas chlamydia and gonorrhea rates were calculated using case numbers from the Centers for Disease Control and Prevention’s National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention and bridged-race population estimates from the NCHS.

More details on sources of data and methods used are available here: http://teenbirths.phi.org/April2014Methods.pdf.
